Athul Sabu

+91 9947811507 — athulsabu324@gmail.com — LinkedIn — GitHub — Portfolio

Summary

Software developer experienced in full-stack development, backend engineering, and scalable systems. Built and deployed production-grade platforms including hiring intelligence systems, payment-integrated applications, institutional automation tools, and real-time execution systems using modern web technologies.

Experience

InfoCreon Solutions Private Limited — Kochi, India
Software Engineer (Contract) — *April 2026 – Present*

- Developing scalable backend systems, asynchronous processing pipelines, and production-grade full-stack applications focused on performance and reliability.

Freelance Developer — Remote
Full Stack Web Developer — *2021 – Present*

- Developed and deployed websites and software solutions for institutions and student communities.
- Built MITS Super League, a football tournament platform to manage and display live points tables and tournament statistics.

Education

Muthoot Institute of Technology and Science — Kochi, India
B.Tech in Computer Science and Engineering — ***CGPA: 9.33*** — *2024 – 2028*

St Joseph's HSS Pullurampara — Kozhikode, India
Higher Secondary Education (Computer Science) — *2022 – 2024*

Technical Skills

Programming Languages: Java, JavaScript, Python, C, C++
Frontend & Web: Next.js 15 (React), Tailwind CSS, HTML5, CSS3
Backend & APIs: Node.js, Flask, REST APIs, WebSockets, Redis
Databases & ORMs: PostgreSQL, MySQL, SQLite, MongoDB, Prisma
Authentication & Security: JWT, NextAuth, bcrypt
Cloud & Storage: Vercel, Render, Google Cloud Storage (Buckets), Cloudinary
Dev Tools & DevOps: Docker, Git, GitHub, Postman, Linux (Ubuntu)
Libraries & Integration: PyMuPDF, scikit-learn, React Query, Razorpay SDK

Projects

CampusForge Engine — Next.js 15, Flask, PostgreSQL, Redis, Docker, PyMuPDF, scikit-learn
* Built a production-grade hiring intelligence platform during the InfoCreon Solutions Technical Internship Challenge.
* Implemented asynchronous resume processing, skill extraction, TF-IDF based job matching, weighted candidate scoring, Redis caching, and recruiter collaboration dashboard with WebSockets.
* Designed scalable architecture with Docker deployment, background job processing, and load-tested APIs supporting high concurrency.

MITS Print – Online Printing System — Next.js 15, PostgreSQL, Prisma, Razorpay, Python
* Designed and deployed a full-stack printing platform with secure authentication, online payment integration, real-time order tracking, and automated PDF processing for print-ready documents.

Hostel Room Allotment System — Java, Java Swing, SQLite
* Built a desktop application to automate hostel room allocation using student preferences, academic year, and room availability logic.

Code2PDF – Realtime C Compiler & PDF Generator — Python, Flask, WebSockets
* Developed a web platform to compile, execute, and convert C programs into formatted PDFs with real-time terminal output streaming for DSA lab submissions.

Achievements

- **First Prize – NEXUS AI Hackathon, MITS Kochi** — Won 1st place in an inter-college AI hackathon competition.
- **HackerRank Certifications** — JavaScript (Intermediate) and Frontend Developer (React).
